HOTEL
MANAGEMENT SYSTEM

INTRODUCTION

The Hotel Management System is a web-based application enabling the hotel manager to handle all online hotel activities. Management of different hotel bookings and rooms makes this system very flexible and convenient. The hotel manager is a very busy person and does not have the time to sit and manage all the activities manually on paper. This application provides him with the power and flexibility to manage the whole system. Hotel management provides room booking, staff management and other features required to manage hotels.
