TRANSPORTATION MANAGEMENT SYSTEM

INTRODUCTION

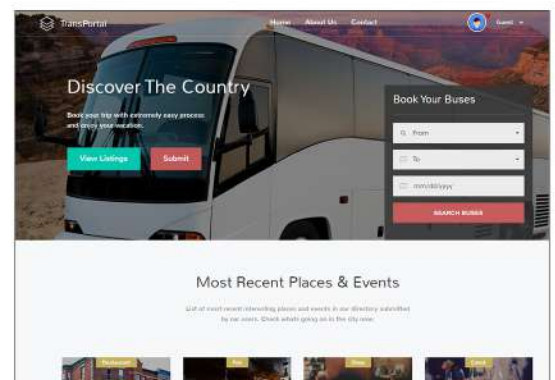

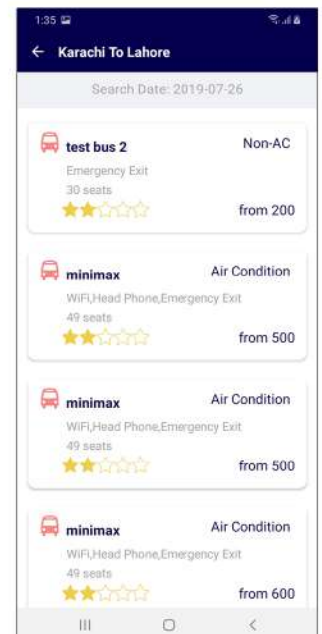

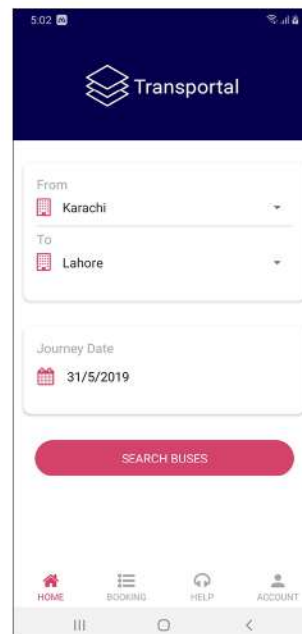

Our Transportation management software designed with effective and innovative technology also has the competence to provide instant ride reporting with full accuracy, so you have acknowledged each thing for the passenger entry and exit of a bus. It can monetize, organize and manage all the transporter or driver performance. Our transport management system gives you access to complete suite of services as well as real-time system data on 100 of buses can be managing functions at the same time. The main purpose of this system is to manage your fleet of buses effort by transforming a better way and you can be called a smart transport idea.

There are simple and easy things for the user, admin and transproter. from this you can manage your system easily. with the help of this it can improve their driving performance,vechicle efficiency.

OBJECTIVES

- * Ineffective route planning, to misguide the passenger for the correct path.
- * Suffering on Reckless Driving.
- * Arrival time is not sure.
- * Miss buses and time not decided.
- * Selection of the bus could be wrong.
- * Manual attendance makes more errors.

DELIVER SMART AND SAFETY SOLUTION

Our Transportation Management Software is designed for the special purpose of managing your fleet of buses effort by transforming a better way and you can be called a smart transport idea. Our services provide real-time tracking information on the whereabouts of your vehicles. Safe and secure like a door opening process, live images capture can also be integrated for assuring and safe place drop off.

PASSENGERS KEEN ALERTS

Parents or guardian get proven alert for pick up and drop off when the bus arrives and reaching at their point of time.

GEO-LOCATION

Each bus stop is accurately marked to know the correct position of your passenger, get an alert as soon the bus deviates from the desired location.

BAR CODE CONFIRMATION

We have implemented the bar code ticketing system; a passenger can generate the bar code for the ticket through the online system.

TICKET CONFIRMATION

Now you can track your ticket through the online, confirmation process is very easy even 10 years old child can be performed.

SEAT SELECTION

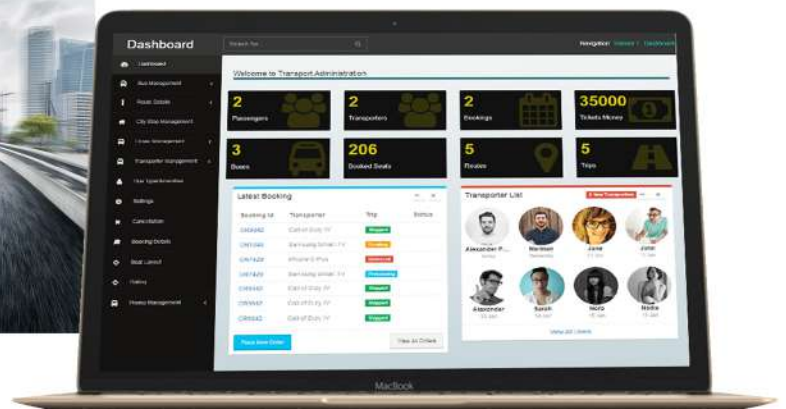

Now you can select your desired seat whether you will want to sit on the entire journey.

VEHICLE SELECTION

We have implemented in our website bus selection system, now passenger can select their vehicle whether it has AC or Non-AC and Wifi or non-Wifi and any other options like lunch, restroom vehicle and more.

There are three accounts in this system

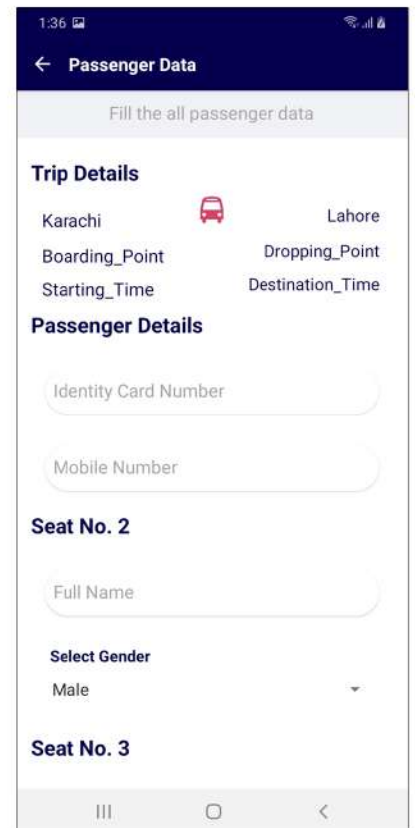

- * Admin
- * Transporter
- * Passenger

In admin and user panel bus management, route details, city stops details, driver management, bus type, booking details, seat layout, promo management etc. Same as for transporter and in passenger account you first have to book your seats booking details and then proceed to payment process.

Here are some Dashboard options

- * Bus Management
- * Route Details
- * City Stop Details
- * Driver Management
- * Bus Type
- * Booking Details
- * Seat Layout
- * Promo Management
